We dragged this one out of storage a few months ago and decided to finish it. This poor car had been passed around thru various owners over the years. It looked like one of those projects that would never see the road. Anyhow here it is. The ultimate sleeper.

A full chassis and body bracing system will make sure that the torque of the driveline won't hurt the car. The powertrain consists of a nicely warmed aluminium head Chev V8, TH350 transmission and L30 rear axle. Rack and pinion steering and boosted disc brakes make the drive nice. The interior is trimmed out in real leather. Floor mounted Lokar shifter and subtle dash gauges eliminate guesswork. As with all our vehicles, brand new components are used throughout. A new wiring harness, brake hoses and master cylinder lines together with a complete overhaul of all the components will ensure trouble free service life.
