1954 2 door post Chevs are rare. Rarer still are ones with 454 big blocks. This one came to us partially complete. We undertook the tasks of wiring the vehicle. A new harness was sourced and installed by us. We also built the accessory drives for the engine. Being limited for room thermo fans were a necessity. We also found that a late model Holden power steering pump with factory style oil reservoir works really well in this application. Gasoline Alley also designed, fabricated and installed an air-conditioner system to this vehicle. The quality of finish together with a keen enthusiasm of both owner and our staff has seen this vehicle win several trophies at various hot rod shows.
