These early japanese cars are really built well. The wiring and fitout is made to last and it shows v example. Some who have seen it in our shop say it's a girl's car. Well they're right. Tania is a app mechanic. This is her first project and we were very impressed with the way the car was presente Everything was clearly marked and organised. Very minimal rust and low mileage will ensure this restores up nicely.

Personally I'd like to put a little windsor V8 in the engine bay. We'll just have to settle for a warmer 18R.
